

TOP SECRET

25 YEAR RE-REVIEW

Attachment 10

Inspector General's Recommendation, Pages 67 and 68 (Annex)

Recommended DCI Action:

1. Approve as modified
2. Approve
3. Approve

Inspector General's Statement

1. The DD/P direct the Clandestine Services Records Committee to undertake an immediate study of the Vital Materials requirements and that a Vital Materials Program be developed and implemented as soon as possible. This Program should be designed to operate as an integral part of the Agency program and fully utilize the facilities offered, and only material which is actually sensitive should be treated as such.

2. The area divisions, senior staffs and other DD/P components be notified in writing of their responsibilities in the over-all DD/P Vital Materials Program.

3. The Committee develop appropriate regulatory issuances to replace [redacted] and [redacted] but that the implementation of the necessary program not be delayed pending the issuance of these regulations.

DD/P Comment

1. Concur with modification: An instruction to implement the first sentence of this recommendation has been drafted and is being co-ordinated. With regard to the last sentence of this recommendation, it is considered preferable to defer action pending further study since it has not yet been determined, in keeping with the new criteria as to what constitutes vital documents, just how much of the material is actually sensitive. It should be noted, however, that since the Clandestine Services must service the sensitive material, very little additional effort is involved in servicing the remaining material.

2. Concur: An instruction to implement this recommendation has been drafted and is being co-ordinated.

3. Concur: An instruction to implement this recommendation has been drafted and is being co-ordinated.
